

PROGRAM

THE IAFA

AESTHETIC SYMPOSIUM

NOV. 6-7 • FONTAINEBLEAU MIAMI BEACH

2026

PRESENTED BY

**International
Academy**
of Facial Aesthetics

HOSTED AT

FONTAINEBLEAU
MIAMI BEACH

IAFA 2026 | NOV.6-7

Welcome to the 14th Annual IAFA Aesthetic Symposium.

This year, we're introducing a reimagined format designed to enhance both education and hands-on learning. Each day features a full conference experience from 8:00 AM to 2:00 PM, including expert-led lectures, live demonstrations, and curated networking over breakfast and lunch.

Attendees also have the opportunity to extend their experience with optional hands-on workshops from 2:00 PM to 6:00 PM, offering more focused, small-group training across a range of advanced topics.

Join internationally recognized experts in aesthetic medicine for two days of elevated education, clinical insight, and immersive training in facial aesthetics and regenerative medicine.

Conference Schedule Overview

Friday, November 6

7:00 AM – 8:00 AM – Premium Breakfast & Registration

8:00 AM – 12:45 PM – Lectures & Demonstrations

12:45 PM – 2:00 PM – Premium Lunch and Featured Presentation

2:00 PM – 6:00 PM – Hands-On Workshops

8:00 PM – 10:00 PM – Friday Night Cocktail Social – Magic City Glow Up

Saturday, November 7

7:00 AM – 8:00 AM – Premium Breakfast

8:00 AM – 12:45 PM – Lectures and Demonstrations

10:00 AM – 10:30 AM – Break & Mingle with Exhibitors

12:45 PM – 2:00 PM – Premium Lunch and Featured Presentation

2:00 PM – 6:00 PM – Hands-On Workshops

Dear Members and Esteemed Guests,

It is with great excitement that we invite you to the 14th Annual IAFA Aesthetic Symposium, taking place November 6-7, 2026, at the iconic Fontainebleau Miami Beach.

Recognized as a leading event in non-surgical aesthetics, this 2-day symposium will feature an exceptional lineup of cutting-edge CE topics, live patient demonstrations, and interactive hands-on workshops led by some of the most respected trainers and experts in the field. Whether you are refining your skills or expanding your treatment offerings, IAFA 2026 offers a powerful educational experience designed to elevate your practice.

Attendees will benefit from practical, high-level training while also connecting with a vibrant network of aesthetic professionals from across the country and abroad. The event will also showcase many of the top aesthetic brands and technologies in the industry—giving you exclusive access to products, tools, and innovations that can immediately enhance your clinical results and business growth.

The continued success of the IAFA Symposium is driven by passionate providers like you—those who believe in lifelong learning and delivering the highest level of patient care. Each year, this event grows in both energy and impact, and IAFA 2026 promises to be our most exciting gathering yet.

On behalf of our entire IAFA team, we look forward to welcoming you this November for a weekend of inspiration, education, and connection.

Warmest regards,

Ana Natalie Delgado

Executive Director, International Academy of Facial Aesthetics

IAFA 2026 | NOVEMBER 5 | PRE-SUMMIT EVENT

DAY 1: THE ANATOMY & INJECTION MASTERCLASS

LIVE DISSECTION | LIVE INJECTION DEMONSTRATION | ULTRASOUND

Led by
PROFESSOR SEBASTIAN COTOFANA

M.D., Ph.D., Ph.D.

World-Leading Facial Anatomist

Co-Instructors: Jill Campbell, MSN, FNP-C, CANS;
Barbara Brandt, APRN, B-C, Internationally Certified Injectables Trainer

Experience an immersive educational program combining instructor-led cadaver dissections with live patient injection demonstrations and ultrasound assessment to provide a comprehensive understanding of facial anatomy and its direct application to aesthetic medicine.

Designed for practitioners seeking to elevate safety, precision, and treatment planning, this masterclass explores the anatomical foundations behind today's most advanced injectable procedures. Through expertly guided dissections, real-time clinical correlation, real-time ultrasound mapping, and live patient treatments, participants will develop a deeper understanding of facial anatomy, facial aging, injection strategy, and complication avoidance.

Throughout the program, Professor Cotofana correlates each anatomical layer with practical injection techniques, helping attendees translate anatomical knowledge into safer, more predictable clinical outcomes.

COURSE HIGHLIGHTS

- Instructor-led cadaver anatomy dissections
- Live patient injection demonstrations
- Real-time anatomical and clinical correlation
- Real-time facial ultrasound assessment
- Facial aging concepts and treatment planning
- Vascular anatomy and complication avoidance
- Anatomy-guided injection strategies for predictable outcomes
- Interactive faculty discussion and Q&A

FEATURED TREATMENTS AREAS

- Upper Face Neurotoxins: Forehead, Glabella, Crow's feet
- Temples
- Periorbital Region
- Tear Trough
- Midface & Cheek Augmentation
- Nasolabial Folds
- Lips & Perioral Region
- Chin & Jawline Contouring

\$1,450

2:00 PM- 7:00 PM

OBSERVATION ONLY

INCLUDED WITH REGISTRATION

- Observation access to all anatomy dissections and live injection demonstrations
- Professor Sebastian Cotofana's Comprehensive Course Manual (Included – \$68 Value)
- Exclusive Pre-Course Preparation Video Series, featuring 9 anatomy review videos (upper, mid, and lower face for neurotoxins and fillers) and 3 laboratory preparation videos covering lab attire, etiquette, and cadaver dissection protocols. (Exclusive to this course; separate from the Cotofana Digital Academy.)
- Interactive faculty Q&A
- Catered refreshments
- Digital Certificate of Attendance

THE ANATOMY & INJECTION INTENSIVE

Led by Professor Sebastian Cotofana, M.D., Ph.D., Ph.D.
World-Leading Facial Anatomist

THE ANATOMY & INJECTION MASTERCLASS

\$1,450

DAY 1 · OBSERVATION ONLY (5 CE)
THURSDAY, NOVEMBER 5 · 2:00 PM–7:00 PM

Led by Professor Sebastian Cotofana, M.D., Ph.D., Ph.D.
Co-Instructors: Jill Campbell, MSN, FNP-C, CANS; Dr. Lanna Cheuck, DO; Barbara Brandt, APRN, B-C, Internationally Certified Injectables Trainer

Instructor-Led Anatomy Dissections, Live Injection Demonstrations, Clinical Application, Live Ultrasound Demonstrations

COURSE HIGHLIGHTS

- Patient Assessment
- Ultrasound assessment
- Toxins: Glabella, Forehead, Lateral canthal lines
- Temples (Volumizing versus Lifting)
- Tear Trough, Cheeks, Nasolabial Folds
- Lips, Chin, Jawline
- Faculty Q&A

HANDS-ON ANATOMY DISSECTION + ULTRASOUND

\$4,250

DAY 2 · HANDS-ON CADAVER TRAINING (5 CE)
FRIDAY, NOVEMBER 6 · 2:00 PM–7:00 PM

Led by Professor Sebastian Cotofana, M.D., Ph.D., Ph.D.
Co-Instructors: Dr. Terry Alford, DMD; Dr. Lanna Cheuck, DO
Ultrasound Instructor: Candice Dery, RDMS

Hands-on cadaveric dissection class, 4:1 ratio (participants per cephalic specimen), Live Ultrasound demonstrations, Injection technique simulation on specimen.

COURSE HIGHLIGHTS

- Injection Biomechanics
- Toxins for the Upper Face
- Temporal volumization
- Cheek augmentation
- Tear trough correction
- Nasolabial fold improvement
- Lip volumization
- Jawline contouring
- Chin projection
- Faculty Q&A
- Certificates & Group Photos

THE COMPLETE EXPERIENCE · 10 CE
NOVEMBER 5–6, 2026

**2-DAY ANATOMY INTENSIVE
BUNDLE - \$4,950 (SAVE \$750)**

Experience the complete educational progression—from expert-led anatomy instruction and live injection demonstrations to hands-on injections, ultrasound correlation, and cadaver dissections that validate technique in real time. Designed to deepen anatomical understanding, refine injection precision, and elevate clinical confidence.

FRIDAY

NOVEMBER 6 | DAY 1

7:00 AM - 8:00 AM

Premium Breakfast & Registration

8:00 AM - 12:45 PM

Lectures & Live Demonstrations

Featuring multiple expert presentations within each session

8:00 AM - 9:15 AM

Complication Management & Safety Protocols

Anatomy, vascular occlusion recognition, and ultrasound-guided intervention

9:15 AM - 10:55 AM

Upper Third Protocols: Forehead, Temples & Periorbital Areas

Safety considerations and advanced treatment approaches

11:15 AM - 12:45 PM

Lower Face & Neck Protocols: Lips, Chin, Jawline & Neck

Non-surgical advancements and structural rejuvenation

10:45 AM - 11:15 AM

Break & Mingle with Exhibitors

12:45 PM - 2:00 PM

Premium Lunch & Featured Presentation

2:00 PM - 6:00 PM

Hands-On Workshops

Participants may enroll in one afternoon workshop.

- Cadaver Dissection for Facial Injectables + Ultrasound *(Until 7:00 PM)*
 - Combination Therapy: Full Facial Balance & Sculpting
 - Multi-Level Neurotoxins
 - Advanced Lip & Perioral Combination Treatment
 - Practice Growth & Strategy Workshop
-

8:00 PM - 10:00 PM

Magic City Glow Up – Friday Night Cocktail Reception

Join faculty and attendees for a two-hour premium open bar networking reception.

NOVEMBER 6

FRIDAY | DAY 1

2:00 PM - 7:00 PM

WORKSHOPS (*SELECT ONE*)

Hands-On Anatomy Dissection + Ultrasound

2:00 PM – 7:00 PM | Friday Workshop

Led by Professor Sebastian Cotofana, M.D., Ph.D., Ph.D.

World-Leading Facial Anatomist

Co-Instructors: Dr. Terry Alford, DMD & Dr. Lanna Cheuck, DO |. Ultrasound Instructor: Candice Dery, RDMS

An advanced, immersive anatomy experience where participants move beyond observation to inject, visualize, and dissect. Working in small groups with individualized faculty guidance, participants perform toxin and filler injections on human body donors, use high-resolution ultrasound to correlate anatomy and injection planes, and then dissect to immediately validate placement and technique.

Through IAFA's progressive Inject → Dissect methodology, participants can see exactly where their injections were placed while exploring facial anatomy, injection biomechanics, product migration, layered techniques, and complication avoidance. This unique combination of hands-on injection, ultrasound, and immediate anatomical validation is designed to build greater precision, confidence, and safety in full-face injectable treatment.

Limited Enrollment | Small-Group Hands-On Training | 4:1 Faculty Ratio | 5 CE

Extend Your Anatomy Experience

Participants can add the 5-hour Pre-Symposium Anatomy Workshop on Thursday, November 5, featuring Professor Cotofana's instructor-led cadaver dissections alongside live patient injection demonstrations and real-time ultrasound mapping. The program connects each anatomical layer directly to clinical injection strategy, facial aging, treatment planning, and complication avoidance—providing an additional five hours of anatomy-to-clinical correlation before Friday's hands-on training.

Attend either workshop individually or combine both days for the complete Anatomy & Injection Intensive.

NOVEMBER 6

FRIDAY | DAY 1

2:00 PM - 6:00 PM

WORKSHOPS (*SELECT ONE*)

Combination Therapy: Full Facial Balance & Sculpting (Fillers + Optional PDO Threads Track)

Faculty: Shanna Concepcion, RN, CANS; Dr. George Baxter-Holder; Amy Faircloth, RN, BSN

Delivering truly transformative results requires more than treating isolated areas—it demands a deep understanding of facial balance, structure, and individualized design.

This advanced workshop focuses on full facial sculpting through combination therapy, teaching providers how to harmonize facial features using strategic filler placement, with the option to focus on PDO threads for enhanced lift and support.

Participants will develop a systematic approach to:

- Assessing facial proportions and structural deficiencies
- Creating balance across the midface, jawline, chin, and tear troughs
- Integrating volume, contour, and lift for cohesive, natural outcomes
- Designing treatment plans that prioritize facial harmony over overcorrection

The workshop features rotating clinical stations, including:

- Facial sculpting with dermal fillers (midface, jawline, chin, tear trough)
- Advanced contouring and structural support techniques
- A dedicated PDO thread station for participants interested in learning lifting and biostimulatory approaches

This course is ideal for providers looking to transition from single-area treatments to full-face aesthetic design, delivering results that are balanced, refined, and anatomically driven.

Multi-Level Neurotoxins

Faculty: Jill Campbell, MSN, FNP-C, CANS; Dr. Laurence Rifkin

This hands-on workshop is dedicated entirely to the various uses of Neurotoxins, focusing not only on popular facial areas but also delving into the lower ⅔ of the face and emerging uses. Whether you are a beginner or seasoned injector, this workshop can be customized clinically to enhance your current experience with neuromodulators, such as Dysport, Botox, Xeomin and Jeuveau. Inexperienced practitioners will gain clinical experience with highly sought-out upper face areas while experienced injectable practitioners will be able to further enrich their existing knowledge with novel uses and techniques.

NOVEMBER 6

FRIDAY | DAY 1

2:00 PM - 6:00 PM

WORKSHOPS (*SELECT ONE*)

Advanced Lip & Perioral Combination Treatment (Filler + Neurotoxin | Individual Patient Hands-On)

Faculty: Barbara Brandt, APRN, BC; Dr. Andrea Asseff

This advanced workshop is designed for providers seeking to master comprehensive lip and perioral rejuvenation through combination therapy, integrating dermal fillers and neurotoxins for refined, natural-looking results.

Moving beyond traditional lip augmentation, this course focuses on full perioral design, teaching participants how to assess and treat the lips in harmony with surrounding structures to restore balance, support, and youthful expression.

Participants will learn how to:

- Analyze lip shape, proportion, and perioral dynamics
- Customize treatment plans using filler and neurotoxin synergy
- Address volume loss, muscle activity, and fine lines simultaneously
- Enhance lip definition while maintaining natural movement and expression

Each participant will work on their own patient, allowing for an immersive, hands-on experience with real-time guidance and technique refinement.

This course emphasizes precision, restraint, and artistry, making it ideal for injectors ready to elevate from basic lip treatments to high-level perioral rejuvenation and detail work.

Practice Growth & Strategy Workshop

Stay ahead in the evolving world of aesthetics with this dynamic workshop designed for injectors, medspa/practice owners, and practice leaders. This session explores the key strategies, technologies, and operational frameworks driving growth and innovation across today's most successful practices.

From emerging digital trends to data-driven decision-making, attendees will gain practical insights on how to optimize performance, enhance patient acquisition, and build scalable, high-performing businesses in an increasingly competitive landscape.

Through a combination of expert-led sessions and interactive discussions, this workshop will cover topics such as:

- Adapting to the evolving digital landscape and patient journey
 - Leveraging data, technology, and emerging tools to inform smarter decisions
 - Identifying key performance indicators (KPIs) that drive revenue and growth
 - Streamlining operations and improving practice efficiency
 - Implementing strategies for sustainable, long-term success

2:00 PM - 6:00 PM

Hands-On Workshops

Participants may enroll in one afternoon workshop.

- Regenerative Aesthetics: PRP/PRF, biofillers & PDGF applications
- TMD Therapeutics Intensive
- Microcannulas for Dermal Filler Injections
- PLLA (Sculptra) Mastery: Biostimulatory Techniques in Facial Aesthetics
- Advanced Aesthetics Protocols: A Global Perspective

SATURDAY

NOVEMBER 7 | DAY 2

2:00 PM - 6:00 PM

WORKSHOPS (*SELECT ONE*)

Regenerative Aesthetics: PRP/PRF, biofillers & PDGF applications

Faculty: Shanna Concepcion, RN, CANS; Amy Faircloth, RN, BSN; Dr. George Baxter-Holder

As patient demand for natural, minimally invasive results continues to grow, regenerative aesthetics has become a cornerstone of modern aesthetic practice. This hands-on clinical workshop explores the expanding role of biologic therapies in aesthetic treatments, equipping providers with practical, in-demand techniques that can be integrated into everyday practice.

This immersive training will feature a range of regenerative approaches, allowing participants to gain experience with key modalities and delivery methods used to improve skin quality, restore volume, and enhance overall facial rejuvenation.

Designed for all skill levels, this workshop includes:

- PRP/PRF applications using injection and/or microneedling techniques for skin rejuvenation and hair restoration
- PDGF+ and exosome delivery through microneedling to support collagen stimulation and tissue regeneration
- Biofiller (PRF gel) techniques utilizing cannula-based approaches for natural volume restoration

Energy-based device integration, including radiofrequency microneedling (RFMN), combined with regenerative treatments for enhanced outcomes

NEW! TMD Therapeutics Intensive:

PBM, Neuromodulators, PRF & Cadaver-Guided TMJ Anatomy

Faculty: Dr. Terry Alford; Dr. Dar Radfar

This 4-hour, small-group workshop combines didactic instruction with live patient diagnosis and case demonstrations to help clinicians confidently assess and manage TMD and orofacial pain. Participants will learn practical photobiomodulation (PBM) protocols and therapeutic decision-making, then deepen anatomical understanding through a cadaver-guided TMJ anatomy demonstration to strengthen landmarking and safety. In an intimate, highly interactive format, attendees will work in pairs and small teams to optimize hands-on learning and clinical application. Treatment modalities include neuromodulators (Botox®) for TMJ/bruxism patterns, trigger point injections, and PRF fundamentals/workflow for supportive management of TMJ pain.

SATURDAY

NOVEMBER 7 | DAY 2

2:00 PM - 6:00 PM

WORKSHOPS (*SELECT ONE*)

■ **PLLA (Sculptra) Mastery: Biostimulatory Techniques in Facial Aesthetics***

Faculty: Barbara Brandt, APRN, BC; Melissa Danin, FNP-BC; Live Demonstration by: Dr. Shino Bay Aguilera

*Must have previous training and experience with dermal fillers

Poly-L-Lactic (PLLA) is in high-demand and once again a “must have” treatment in every provider’s aesthetic tool box. Ideal for whole face volume loss, PLLA such as Sculptra has a liquid consistency and, differing from gel-like dermal fillers, works deep within the skin to stimulate the body’s natural production of collagen. Collagen is a fibrous protein in the deep dermis that gives skin structure and supports the functions of elastin and Hyaluronic acid (HA), which helps maintain the skin’s shape while keeping it smooth and hydrated. Expand your injectable skills and learn how this unique product can take your aesthetic results and practice to the next level.

■ **Microcannulas for Dermal Filler Injections***

Faculty: Jill Campbell, MSN, FNP-C, CANS; Dr. Mica O’Gilvie

Microcannulas are considered a superior method to effectively deliver dermal fillers to your patients. Safer than needles, blunt-tipped cannulas only use a single entry point and glide smoothly under the skin without cutting nerves and vessels. Resulting in greater patient satisfaction, microcannulas deliver dermal fillers with virtually no bruising, diminished swelling, considerably reduced pain, and less risks of more serious complications (necrosis / blindness / vascular issues). In addition, the blunt-tip cannulas may also stimulate collagen production because of the nature of the technique used. This advanced, hands-on workshop will teach you how to properly evaluate patients, diagnose and treatment plan for microcannula enhancements.

■ **Advanced Aesthetics Protocols: A Global Perspective**

Faculty: Dr. Lanna Cheuck; additional faculty to be announced

This interactive, hands-on workshop introduces participants to advanced aesthetics philosophies and innovative protocols shaping the future of the industry on a global scale.

Led by industry expert and sought-after educator Dr. Lanna Cheuck, DO, attendees will work in small groups to explore cutting-edge techniques and combination treatment approaches, while developing customized plans rooted in facial harmony, skin health, and natural, refined outcomes.

Designed to provide both clinical insight and practical application, this workshop offers a unique opportunity to engage with emerging technologies, evolving treatment strategies, and globally inspired approaches to modern aesthetics care.
