

Dear Members and Esteemed Guests,

It is with great excitement that we invite you to the 13th Annual IAFA Aesthetic Symposium, taking place November 7–8, 2025, at the iconic Eden Roc Miami Beach.

Recognized as a leading event in non-surgical aesthetics, this 2-day symposium will feature an exceptional lineup of cutting-edge CE topics, live patient demonstrations, and interactive hands-on workshops led by some of the most respected trainers and experts in the field. Whether you are refining your skills or expanding your treatment offerings, IAFA 2025 offers a powerful educational experience designed to elevate your practice.

Attendees will benefit from practical, high-level training while also connecting with a vibrant network of aesthetic professionals from across the country and abroad. The event will also showcase many of the top aesthetic brands and technologies in the industry—giving you exclusive access to products, tools, and innovations that can immediately enhance your clinical results and business growth.

The continued success of the IAFA Symposium is driven by passionate providers like you—those who believe in lifelong learning and delivering the highest level of patient care. Each year, this event grows in both energy and impact, and IAFA 2025 promises to be our most exciting gathering yet.

On behalf of our entire IAFA team, we look forward to welcoming you this November for a weekend of inspiration, education, and connection.

Warmest regards,

Ana Natalie Delgado

Executive Director, International Academy of Facial Aesthetics

## NOVEMBER 7 DAY 1 | CONFERENCE DAY

Day 1 of the 2025 Aesthetic Symposium is set to be an unforgettable experience! Get ready for an immersive, all-inclusive education as we dive into a diverse range of cutting-edge, in-demand topics in the facial aesthetics industry. An all star faculty of multi-specialty experts, including acclaimed speakers and renowned industry leaders, will cover the latest trends and most pressing topics shaping the field.

But that's not all-prepare to see innovation in action with live-patient demonstrations showcasing the most advanced techniques. Throughout the day, you'll have the chance to connect with the country's leading aesthetics companies, all while networking and building lasting relationships with top-tier peers in the industry.

When the learning wraps up, don't miss the Bites & Mingle at the exhibitor floor with the opportunity to mix and mingle with colleagues from across the globe. Later that evening, join us for the much-anticipated social event by the pool - 2025 theme - Frozen In Time: Hollywood Glam. Dress to impress at this exclusive cocktail reception - your chance to expand your network in a fun, vibrant atmosphere. Enjoy live entertainment and a premium open bar, all included with your tuition.

8:00 AM - 9:00 AM

Registration & Breakfast

9:00 AM - 12:00 PM

**Morning Lectures & Live Demos** 

12:00 PM - 1:25 PM

**Lunch Break & Awards** 

1:25 PM - 6:00 PM

Afternoon Lectures & Live Demos

6:00 PM

**Bites & Mingle** 

7:30 PM - 9:30 PM

Frozen in Time: Hollywood Glam Cocktail Party

Consult with Confidence: Proven Strategies to Build Rapport, Educate and Close Jill Campbell, MSN, FNP-C, CANS

### BREAKFAST WITH DR. SHINO BAY AGUILERA

### SATURDAY | 08 NOV 2025 7:45AM-8:30AM

### **Lecture Topic:**

Functional Aesthetic Medicine: The Bridge between Bioregenerative Medicine and Orthomolecular Medicine

### **Live Demo:**

Gender Matters: Biostimulatory Strategies with poly-L-lactic acid (PLLA), calcium hydroxylapatite (CaHA) & PDGF for Male vs. Female Aesthetic Design

**RESERVE YOUR SPOT** 

IAFA.CO | (877) 759-7848

## DAY 2 | WORKSHOP DAY

Continuing the fun, day 2 of the Symposium offers the opportunity to participate in a variety of advanced hands-on / interactive workshops that will take your skillset and expertise to the next level. Under the expert guidance of the 2025 Faculty, the advanced clinical workshops combine expert demonstrations, discussions, and practical hands-on experience on pre-qualified live model patients. Take the opportunity to choose from both AM / PM sessions to advance your skills and master your techniques. \*Reserve your seats early - workshops fill quickly.

7:30 AM - 8:30 AM

**Registration & Breakfast** 

7:45 AM-8:30 AM

Breakfast Session | Dr. Shino Bay Aguilera, DO, FAOCS

Functional Aesthetic Medicine: The Bridge between Bioregenerative Medicine and Orthomolecular Medicine

**LIVE DEMO** 

Gender Matters: Biostimulatory Strategies with poly-L-lactic acid (PPLA), calcium hydroxylapatite (CaHA) & PDGF for Male vs. Female Aesthetic Design

8:30 AM - 12:30 PM

### **Morning Workshops**

- Cadaver Dissection for Facial Injectables + Ultrasound
- · Multi-Level Neurotoxins
- NEW! Regenerative Aesthetics: PRP/PRF, Biofillers & PDGF+ and PRF/PRP for TMD Therapy
- PLLA (Sculptra) Mastery: Biostimulatory Techniques in Facial Aesthetics
- Microcannulas for Dermal Filler Injections

12:30 PM - 1:30 PM

### **Award Ceremony**

Lunch & Learn | Legally Mine

Safeguarding Wealth: Lawsuit Prevention & Tax Strategies

1:30 PM - 5:30 PM

### **Afternoon Workshops**

- **NEW!** Combination Therapy: Facial Sculpting with Fillers, PDO Threads & Advanced TMD Therapy with PRF
- Lip Rejuvenation with Fillers, Neurotoxins + Threads
- NEW! Aesthetic Energy Immersion: Lasers & RFMN Clinical Lab
- The Intelligent Practice: Key Al Strategies for Growth & Precision in Aesthetics
- NEW! Enhancement of Facial Beauty through the Esthetic Management of the Gingival Smile

8:30 AM - 12:30 PM

### **MORNING WORKSHOPS (SELECT ONE)**

### | Cadaver Dissection for Facial Injectables + Ultrasound

Faculty: Dr. Terry Alford; Dr. Ricardo Perez & Dr. Shawn Cabbell Ultrasound Instructor: Alfredo Ferreyra, RDMS

Anatomical knowledge is fundamental to becoming a highly skilled, safe injector. This Facial Injectables Cadaver Workshop provides the highest level of anatomical training to expand your repertoire of facial injectables. Working in small groups, participants will dissect cadaver faces to identify pertinent anatomy (muscular structures, fat pads, dermal depths) and learn correct injection techniques to avoid complications and adverse effects. This hands-on workshop, exclusively at the IAFA Aesthetic Symposium, will give participants a high-level understanding of the essential anatomy of the face as it pertains to facial injectables.

Further enhancing your anatomy training, attendees will have a unique opportunity to gain foundational facial ultrasound education to enhance understanding of facial anatomy through real-time ultrasound imaging. Through guided sessions, participants will learn to apply ultrasound at their practice to improve safety and proficiency in performing aesthetic treatments.

Attendees will also receive a comprehensive cadaver workbook to fully guide them through the workshop, serving as an excellent post workshop review.

### **Multi-Level Neurotoxins**

Faculty: Dr. Laurence Rifkin & Corinn Singletary, PA-C

This hands-on workshop is dedicated entirely to the various uses of Neurotoxins, focusing not only on popular facial areas but also delving into the lower % of the face and emerging uses. Whether you are a beginner or seasoned injector, this workshop can be customized clinically to enhance your current experience with neuromodulators, such as Dysport, Botox, Xeomin and Jeauveu. Inexperienced practitioners will gain clinical experience with highly sought-out upper face areas while experienced injectable practitioners will be able to further enrich their existing knowledge with novel uses and techniques.

Facial Neuromodulator treatments include:

- Glabella/ Forehead/ Crow's Feet
- Nose/ Gummy Smile, Lip Lines/ Lip Flip
- Chin/ Jawline/ Lower Mouth Depressors (Platysmal, DAO, Mentalis)
- Facial Slimming and Headache Therapy (Temporalis, Masseter, Migraine, Trapezius)
- Novel uses of Toxins Skin quality, Pores, Acne, Rosacea

8:30 AM - 12:30 PM

### MORNING WORKSHOPS (SELECT ONE)

### PLLA (Sculptra) Mastery: Biostimulatory Techniques in Facial Aesthetics\*

Faculty: Barbara Brandt, APRN, National Injectables Trainer & Melissa Danin, MSN, APRN, FNP-BC

### \*Must have previous training and experience with dermal fillers

Poly-L-Lactic (PLLA) is in high-demand and once again a "must have" treatment in every provider's aesthetic tool box. Ideal for whole face volume loss, PLLA such as Sculptra has a liquid consistency and, differing from gel-like dermal fillers, works deep within the skin to stimulate the body's natural production of collagen. Collagen is a fibrous protein in the deep dermis that gives skin structure and supports the functions of elastin and Hyaluronic acid (HA), which helps maintain the skin's shape while keeping it smooth and hydrated. Expand your injectable skills and learn how this unique product can take your aesthetic results and practice to the next level.

This workshop led by Barbara Brandt, PA-C will provide participant's with a comprehensive approach to PLLA, including how to properly treatment plan and use the safest techniques to provide full face rejuvenation. After leaving this innovative workshop, you will be prepared with the must-know pearls on PLLA and how to best use it to optimize aesthetic cases.

This hands-on workshop will include overview and live demonstration of proper reconstitution and a live injection demonstration. This training is limited to 12 participants to provide a proper, intimate learning environment for hands-on clinical training.

All model patients must be pre-screened prior to this workshop.

### Microcannulas for Dermal Filler Injections

FaFaculty: Jill Campbell, MSN, FNP-C, CANS & Dr. Kamica O' Gilvie, DNP, National Injectables Trainer

Microcannulas are considered a superior method to effectively deliver dermal fillers to your patients. Safer than needles, blunt-tipped cannulas only use a single entry point and glide smoothly under the skin without cutting nerves and vessels. Resulting in greater patient satisfaction, microcannulas deliver dermal fillers with virtually no bruising, diminished swelling, considerably reduced pain, and less risks of more serious complications (necrosis / blindness / vascular issues). In addition, the blunt-tip cannulas may also stimulate collagen production because of the nature of the technique used. This advanced, hands-on workshop will teach you how to properly evaluate patients, diagnose and treatment plan for microcannula enhancements.

Participants will learn various cannula injection techniques and understand when the application is advantageous to optimize aesthetic cases. You will also gain an understanding of the different sizes and types of microcannulas that are made for a variety of dermal fillers and injection depths that can be used for superficial injections to deep injections.

\*Workshop Prerequisite: Attendees of this workshop must be experienced injectors with a minimum of 6 months continuous injecting experience with hyaluronic acid dermal fillers.

8:30 AM - 12:30 PM

MORNING WORKSHOPS (SELECT ONE)

### NEW! Regenerative Aesthetics: PRP/PRF, Biofillers & PDGF+ and PRF/PRP for TMD Therapy

Faculty: Dr. H. William Song, MD; Dr. Jarrod Cornehl; Dr. Julio Hernandez; Shanna Concepcion, RN, CANS & Amy Faircloth, RN, BSN

As patient demand for natural, minimally invasive results continues to rise, regenerative aesthetics is quickly becoming one of the most sought-after offerings in modern aesthetic practice. This hands-on clinical workshop explores the powerful role of biologic treatments in both cosmetic and therapeutic applications—positioning you at the forefront of what today's aesthetic patient is actively seeking. Led by Dr. H. William Song, one of the world's leading experts in cosmetic and regenerative medicine, the workshop features immersive live training in PRP/PRF, biofillers and use of microneedling and radiofrequency microneedling (RFMN) with PDGF+

You'll work directly with regenerative tools that leverage the body's natural healing mechanisms to restore volume, improve skin tone and texture, and enhance overall facial harmony. Designed for all skill levels, this workshop includes:

- PRP/PRF applications using injections and/or microneedling to treat signs of aging, scarring, and hair thinning.
- PDGF+ or Exosome delivery via microneedling to stimulate collagen production and cellular regeneration.
- Biofiller (PRF gel) injections using cannula techniques—recommended for providers with prior cannula experience—to address midface and tear trough volume loss with a natural, autologous approach.
- A dedicated RFMN station demonstrating how to combine radiofrequency microneedling with regenerative serums for enhanced skin tightening and rejuvenation.

### **Advanced TMD Therapy with PRF**

In addition to aesthetic applications, this workshop also highlights the therapeutic power of regenerative medicine with a specialized station focused on PRF for temporomandibular disorders (TMD). You'll learn how to perform targeted PRF injections to reduce TMJ-related pain, inflammation, and dysfunction—offering patients a natural, minimally invasive alternative to traditional therapies. This protocol is ideal for providers looking to expand into functional injectables that support both comfort and mobility in the jaw and facial musculature.

1:30 PM - 5:30 PM

### **AFTERNOON WORKSHOPS (SELECT ONE)**

### NEW! Combination Therapy: Facial Sculpting with Fillers, PDO Threads & Advanced TMD Therapy with PRF

Faculty: Corinn Singletary, PA-C; Amy Faircloth, RN, BSN; Dr. Kamica O' Gilvie, DNP & Dr. Jarrod Cornehl

Delivering truly transformative results starts with mastering the art of facial rebalancing—a technique that combines structure, symmetry, and individualized treatment planning. This hands-on workshop allows participants to assess facial proportions and implement advanced combination therapies to sculpt and lift the face while restoring youthful balance. Participants will rotate through small-group clinical stations where they'll apply full facial sculpting techniques using dermal fillers, including contouring the midface, jawline, chin, and tear troughs. Two dedicated sculpting stations will guide attendees through advanced filler techniques, while a third station introduces PDO thread lifting techniques to complement volume-based treatments and enhance facial support and definition.

Additionally, a specialized station will focus on: Advanced TMD Therapy with PRF

Incorporating the therapeutic benefits of regenerative medicine, this station demonstrates how to use PRF injections for the treatment of temporomandibular disorders (TMD). Participants will learn targeted techniques to reduce TMJ pain, inflammation, and dysfunction—providing patients with a safe, natural, and minimally invasive alternative to conventional treatments. This is ideal for providers looking to expand into functional injectable therapies that support both jaw mobility and muscle relief.

### **Treatments Covered in the Workshop:**

- Temples
- Tear Trough
- Mid-face Augmentation
- Jawline Contouring

- Chin Augmentation
- · Brow Lift with Fillers
- PDO Thread Lifting
- Advanced PRF Injections for TMD

Participants will rotate through multiple small-group stations to observe and assist in full facial sculpting with dermal fillers and PDO thread lifts, and PRF injections for TMD therapy. While all participants will gain exposure to every station, each attendee must select their preferred focus for hands-on practice:

- Join a full facial sculpting case using fillers on pre-selected model patients
- Perform PDO thread lifting techniques with instructor guidance (experienced injectors only)
- Bring a pre-approved TMD patient to perform PRF therapy for jaw pain and dysfunction

\*All patients must be pre-screened and approved for hands-on participation.

### Lip Rejuvenation with Fillers, Neurotoxins + Threads

Faculty: Barbara Brandt, APRN; Dr. Shawn Cabbell, National Injectables Trainers & Dr. Kamica O' Gilvie, DNP

This workshop teaches attendees the art and skill of various advanced injection techniques to provide patients with the most optimal results for Lip Rejuvenation. Participants will learn how to use different techniques and modalities including HA fillers, neurotoxins and PDO smooth threads to achieve the most comprehensive smile makeovers. Attendees will be able to better assess the appropriate size lips for patients' facial anatomy, giving them natural looking, well-proportioned lips and surrounding perioral areas.

1:30 PM - 5:30 PM

### **AFTERNOON WORKSHOPS (SELECT ONE)**

### **NEW!** Aesthetic Energy Immersion: Lasers & RFMN Clinical Lab

Faculty: Dr. Terry Alford, DMD & Dr. Larry Lieberman, DDS and Dr. Julio Hernandez

Featuring Laser & Radiofrequency Microneedling Multi-Platform Systems

Energy-based treatments are a core element of modern aesthetic medicine, offering powerful results with minimal downtime. In this hands-on clinical immersion, participants will explore the latest in aesthetic energy technology through guided, live demonstrations and interactive stations.

Led by renowned laser pioneer Dr. Alford, this workshop covers laser-based protocols including:

- Smoothlase a unique vectored intraoral technique for non-invasive facial lifting
- Liplase a non-injectable laser alternative to lip fillers, promoting fuller lips through collagen stimulation

This workshop will also include a cutting-edge Radiofrequency Microneedling (RFMN) & multi-modality energy platform station. This advanced system combines fractional and non-fractional RF technologies to treat:

- Acne scars & deep wrinkles
- Hyperpigmentation & stretch marks
- Skin laxity in areas such as cheeks, submental, neck & décolleté
- Jawline contouring & submental tightening
- Body rejuvenation: arms, abdomen, knees & more

Participants will learn clinical applications, treatment protocols, patient selection, and energy settings for maximum results across skin types and treatment zones.

Whether you're expanding your current offerings or looking to implement energy devices for the first time, this immersive experience is designed to give you the confidence and skills to integrate high-demand aesthetic energy treatments into your practice.

### **NEW!** The Intelligent Practice: Key Al Strategies for Growth & Precision in Aesthetics

Stay ahead of the curve in aesthetic medicine with this cutting-edge workshop designed for injectors, medical spa owners, and practice leaders. Discover how to harness the power of artificial intelligence (AI) and data to drive growth, streamline operations, and sharpen decision-making.

Session 1: Competing in the New Digital Landscape | Michael Antosy, Director of Business Development, MyAdvice

- Google's new AI search overview: how the search landscape is shifting
- What Experience, Expertise, Authority, Trustworthiness (E-E-A-T) look like now, and how to build/communicate them
- How digital strategies must adapt to generate leads and revenue when patients are found via Al-powered tools

### Session 2: From Data to Decisions — Turning KPIs Into Profitable Strategies | Randy Torban, Consultant & VP of Patient Acquisition, EntityMed AI

- Looking at \$1 to understanding the value of data
- · How AI tools (in marketing, EHR, patient engagement) help produce accurate, timely data for decision-making
- Diving into marketing and revenue KPIs Interactive with worksheets for the audience
- Using KPIs to measure how successful we are Interactive with worksheets for the audience

1:30 PM - 5:30 PM

### **AFTERNOON WORKSHOPS (SELECT ONE)**

NEW! Enhancement of Facial Beauty through the Esthetic Management of the Gingival Smile: Harmonization between the Lip Lines, the Gingival Marginal Contour, the Cervical Alveolar Bone, the Cervical Enamel Junction, and the Optimal Teeth Proportions

Faculty: Hands-On Workshop with Pr. Dr. André P. Saadoun

In facial aesthetics, the smile is the focal point—framing and balancing the lips, gingiva, teeth, and facial expression. For dentists, after a correct and precise diagnosis, mastering the relationship between the lip outline, gingival contours, bone architecture, tooth proportions, and overall facial harmony is key to delivering results that are both functional and aesthetically exceptional.

This immersive hands-on workshop is led by Professor Dr. André P. Saadoun, globally recognized periodontist and educator, who has authored over 150 scientific articles and several foundational books on soft tissue management. Dr. Saadoun brings a wealth of knowledge in periodontal surgery and smile design, helping clinicians integrate surgical precision with artistic outcomes.

### **Hands-On Experience:**

This 4-hour workshop includes step-by-step instruction and practice on gingival and bone models (2 participants per station), allowing dentists to simulate the full protocol for aesthetic crown lengthening procedures designed to manage excessive gingival display, called a gingival smile.

### Participants will:

- Accurately diagnose and classify different types of gingival smiles
- Perform a sulcular then marginal internal beveled incision at the proposed smile line using Blade 15C
- Raise a limited, full-thickness mucoperiosteal flap with a periosteal elevator
- Remove in one piece the cut gingival margin
- Gain direct access to the buccal bone and subgingival structures
- Use tungsten and diamond burs for controlled osteoplasty/ostectomy
- Finalize the ostectomy to reestablish proper biological width and bone contour
- Reposition and suture the flap (continuous or interrupted techniques)
- Confirm a 3 mm flap margin-to-cervical bone distance to support new sulcus/biological width formation and long-term periodontal stability/esthetic results

This workshop is ideal for general dentists, periodontists, and aesthetic clinicians looking to elevate their smile design capabilities with evidence-based soft tissue and bone management techniques. Enhance your ability to deliver comprehensive, high-level aesthetic results where the smile seamlessly integrates into the full facial landscape.
